

Installation Instructions for RP900375 Flexzilla Pro Fitting

How To Repair Hose Using A Reusable End

Step 1

Cut the damaged portion of hose at 90°. Slide the bend restrictor onto the hose.

Step 2

Place barb fitting against a solid surface and push the hose onto the barb until the hose reaches the threads as shown above.

Step 3

Slide the bend restrictor to the threads on the fitting.

Step 4

Place a wrench on the bend restrictor hex. Place another wrench on the male fitting. While keeping the male fitting stationary, tighten the bend restrictor until snug.
