Congratulations, you have purchased the finest air filter that money can buy. With proper care, this filter can last many seasons. This filter can be used in a stock machine, with no modifications required. If any engine modifications have been made tuning/jetting adjustments may be required. There are special installation instructions, so please follow the procedures outlined below to ensure the K&N® air filter seals properly.

INSTALLATION:

1. Remove the stock air filter.
2. Carefully clean the inside of the airbox.
3. If needed apply a thin layer of the grease on the intake tube inside of the airbox.

NOTE: This is to aid in the installation of the K&N® air filter.

4. Align the K&N® air filter with the guide inside the airbox.
5. Install the K&N® air filter into the airbox making sure it is completely seated.
6. Reinstall the airbox lid.

THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.
