

Part #280 - 1955 Bel Air Quarter Panel Moulding Clips

This set is composed of several different sized clips for both long quarter mouldings. To install, follow contour of moulding. Lay out clips next to moulding according to width, where moulding is thinner, use thinner clips. (Tip: if you are a novice, it will be easier for you to lay out clips and moulding next to the car.) The clips in this package have two different sizes of studs and two different sizes of nuts. Most use 10x24 studs, however, several take a 12x24 nut. Use nut with bigger hole on clips with larger stud.
