Interior model for use in cars, pickups, vans and SUV's

Covercraft Industries, Inc. • 100 Enterprise Blvd. • Pauls Valley, OK 73075 • 405-238-9651 • Fax: 405-238-9601

Form # 566 (10-06)

Easy no-drill installation...

Hardware kit includes automotive-grade fasteners and/or 3M™ VBH™ adhesive tape (depending on application)

If required, remove specified clips/fasteners inside trunk lid

Align and install Pocket Pods™ using provided mounting components

Installation complete!

Depending on design, back panel is rigid HDPE or vacuum-formed ABS

Contoured and patterned to fit trunk lids. No holes to drill.

Vehicle owners are always looking for additional storage areas within a vehicle. Pocket Pods™ offers a simple and effective solution, providing a place to store lightweight cleaning supplies, maps, manuals, first aid kits, etc.... organized and out of the way!

Molded storage pockets with flaps are shaped and contoured, patterned to fit many popular vehicles. A universal-size unit is also available that mounts on the backside of any bucket seat with headrest (built-in or adjustable).

Latex-backed carpet is heat-formed based on pattern-specific design molds and mounted to a rigid HDPE or vacuum-formed ABS backing. Depending on the application and space available for mounting, the Pocket Pods™ design can include one, two or three storage pockets. If trunk-mounted, the design always allows easy access to the inside trunk safety release handle.
