K&N® Cabin Air Filters replace your vehicle's stock cabin filter with a reusable design that cleans and freshens incoming air. They are electrostatically charged to grab and hold dust particles. K&N® cabin air filters help control odors while they help capture most mold, mildew, fungus, spores, bacteria and germs. When they get dirty they can be cleaned and reused and best of all, they come with a 10 year/100,000 mile limited warranty.

When applicable, refer to owner's manual for manufactures installation/removal instructions. The following are helpful steps when replacing/servicing cabin air filter with K&N® cabin air filter.

1. Open glove box.
2. Locate and remove stop feature from glove box. Fig 2 & 3.
3. Apply pressure to the left and right side of the glove box to allow it to hang free and gain access to the cabin filter housing. Fig. 4 & 5
4. Locate cabin air filter housing and remove housing cover. Fig. 6
5. Remove dirty cabin filter from housing. Remove any debris that might be present in the cabin filter housing Fig. 7
6. Install K&N® Cabin Filter. **NOTE: Filter can only be installed one way.** Fig. 8 & 9
7. Reverse steps 1-4 to complete cabin filter installation. With the cabin filter installed, clean an area on the cabin filter housing and apply the K&N® Stop Decal. The decal will help notify others that this is a re-usable cabin filter.
