

INSTALLATION INSTRUCTIONS

PART NUMBER: VF-2077

This Assembly Fits:

SEE CATALOG FOR CURRENT APPLICATIONS

K&N® Cabin Air Filters replace your vehicle's stock cabin filter with a reusable design that cleans and freshens incoming air. They are electrostatically charged to grab and hold dust particles. K&N® cabin air filters help control odors while they help capture most mold, mildew, fungus, spores, bacteria and germs. When they get dirty they can be cleaned and reused and best of all, they come with a 10 year/100,000 mile limited warranty.

1. Locate and remove the 2 screws on the under-dash panel under the glove box. **(Fig. 1)**
2. Remove under-dash panel to expose the cabin filter housing door. **(Fig. 2)**
3. Remove the 4 screws on the cabin air filter housing door. **(Fig. 3)**
4. Remove the dirty cabin air filter from housing. **(Fig. 4)**
5. Install the K&N cabin air filter **(Fig. 5)**
6. Reverse steps 1 – 3 to complete cabin filter installation. With the filter installed, clean an area in the glove box and apply the K&N Stop Decal. The decal will help notify others that this is a re-usable cabin air filter.

Please visit our website knfilters.com for a complete listing of other K&N® products for your vehicle, such as oil filters, air filters, and intake kits. We recommend refreshing your K&N® Cabin Air Filter every 12 months, or 12,000 miles. Use K&N® Refresher kit pt.# 66-6000 which includes the easy to follow instructions.
