

INSTALLATION INSTRUCTIONS

PART NUMBER: VF2082

This Assembly Fits:

SEE CATALOG FOR CURRENT APPLICATIONS

K&N® Cabin Air Filters replace your vehicle's stock cabin filter with a reusable design that cleans and freshens incoming air. They are electrostatically charged to grab and hold dust particles. K&N® cabin air filters help control odors while they help capture most mold, mildew, fungus, spores, bacteria and germs. When they get dirty they can be cleaned and reused and best of all, they come with a 10 year/100,000 mile limited warranty.

When applicable, refer to owner's manual for manufactures installation/removal instructions. The following are helpful steps when replacing/servicing cabin air filter with K&N cabin air filter.

1. Open glove box and remove the six screws on top, side & back of glove box as shown. Figs. (1 & 3)
2. Pull glove box compartment to release glove box and gently set it on floor. **NOTE:** Be careful not to damage the connected cable on the glove box. Figs. (4 & 6)
3. Locate the cabin air filter housing & remove filter cover. (Fig. 7)
4. Remove dirty cabin air filter from housing. Clean any debris that may be present inside the cabin filter housing. (Fig. 8)
5. Install K&N cabin air filter with K&N logo facing out and notch up. Fig. 9
6. With the cabin filter installed, clean an area near the filter door and apply the K&N Stop Decal. The decal will help notify others that this is a re-usable cabin filter.
7. Reverse steps 1-4 to complete the installation.
