#3077D**

Installation Instructions

Check out the install video of this product on our website www.JLosc.com Search: 3077D and click videos

Please review complete instructions prior to installing.

Step#	
1	Verify you have all of the following parts included in the kit: (1) J&L Oil Separator with hoses, (1) J&L Mounting bracket, (2) Fine thread machine screws
2	Gather all of the following tools needed for the installation: Phillips screwdriver, Standard Pliers, 10mm socket, ratchet, extension and light grease or oil
3	Remove the engine cover by unscrewing the 10mm bolt on the back passenger side of cover above the oil fill cap, lift the front of the cover to release it from the two grommets. 
4	Mount J&L Oil Separator to mounting bracket with supplied mounting screws, align logos so they face the same direction
5	Locate and remove stock PCV line from valve cover, you may need to use a pair of pliers to twist connect to break it free. 

Remove the 10mm bolt located in the photo below.

Mount J&L Oil Separator assembly to this location with the same bolt you removed.

Use light grease or oil to lubricate the end of the hose without the fitting installed. Also lubricate PCV valve with the same oil/grease, this will help you side the hose onto the fitting. This will be tight so don't be afraid to use the lube!

Connect hose with fitting to the factory hose you disconnected earlier. The fitting in the end of the hose will rotate as needed for adjustment.

8	Reinstall engine cover.
9	Check the oil separator after 1000 miles of driving.

To properly clean the filter in the Oil Separator, spray any degreaser or solvent through it and let it air dry. Clean it every 10,000 miles. Thank you for your business. If you have any questions, please e-mail info@JLosc.com or call 757-842-6497. Our hours are Monday-Friday. 8:00am – 4:30pm Eastern Time.
